AI AGENTS

NO CODE TOOLS: N8N, MAKE

ABOUT GALTECH SCHOOL OF TECHNOLOGY

GALTech School of Technology is a premier IT Finishing School dedicated to equipping aspiring professionals with cutting-edge skills in today's fast-paced tech world. We offer a diverse and industry-relevant range of programs, including Artificial Intelligence, AI Agents, Prompt Engineering, Data Science, Data Analytics, Full Stack Development, and Digital Marketing, all designed to meet the evolving needs of the tech industry.

Our hands-on approach to learning, combined with real-world projects and expert mentorship, ensures students gain both confidence and practical experience. With a strong focus on innovation, up-to-date technology, and career-oriented training, GALTech prepares students not just for jobs, but for impactful careers in technology.

Whether you're starting your journey or upskilling for a new opportunity, GALTech is your trusted partner for success in tech.

COURSE CERTIFICATIONS

GALTech School Course Completion Certification

COURSE OBJECTIVES

- Understanding AI Agents and No-Code Tools
- Hands-On Experience with No-Code Platforms
- Designing and Optimizing Workflows
- Advanced Integrations and Real-World Use Cases

DURATION

- Total: 1 Month
- 1 or 2 Hours/Day, 5 Days/ Week

WHO CAN JOIN?

- Anyone interested in technology
- No prior programming or technical background required

COURSE CONTENT

Week 1:

Introduction to AI Agents and No-Code Platforms

- What are AI agents?
- How AI Agents works
- Difference between AI, Generative AI, AI Agents and Agentic AI
- Real-world applications of AI agents

Large Language Models (LLMs) and API's

- What are LLM's
- Understanding LLMs and their capabilities
- Setting up different LLM Models and API's (Open AI, Gemini, Openrouter)
- Introduction to google cloud for APIs
- Setting up of different API accounts like Airtable, SERPER etc.

Prompt Engineering

- Introduction to prompting.
- Zero shot
- Few shot
- Chain of thoughts

COURSE CONTENT

Activities:

- Explore examples of AI agents in daily life
- Set up accounts on n8n
- Setting up of accounts with different LLM's.
- Setting up of GCP and other platforms
- Trying different prompts to get maximum output from LLM
- Preparing prompts for AI Agents

Week 2:

N8n - Basic Concept

- n8n interface and navigation
- Creating your first workflow
- Understanding nodes and their functions
- Basic workflow automation concepts
- Creating your first AI Agents
- Understanding different nodes and how to use them
- Using different nodes including http node.

Activities:

- Build a simple workflow to automate a daily task
- Experiment with different nodes and triggers
- Basic Chatbot
- Gmail Automation
- Daily routine Ai Agent(Spreadsheet and other workflows)
- Study how to build your own workflows

COURSE CONTENT

Week 3:

N8n - Advanced Concept

- RAG (Retrieval-Augmented Generation) Basics
- Introduction to Vector Databases
- Pinecone Hands-on
- Advanced Workflow with Pinecone
- Introduction to MCP (Model Context Protocol)
- Creating Agent using MCP

Workflow Design and Best Practices

- Principles of workflow design
- Identifying tasks suitable for automation
- Optimizing workflows for performance
- Testing and debugging workflows

Activities:

- Analyze and improve an existing workflow
- Implement error handling in a complex workflow

COURSE CONTENT

Week 4:

Advanced Integrations and Use Cases

- Connecting to various APIs (e.g., Google Sheets, Slack)
- Building multi-step workflows
- Use cases: customer support bots, content generation, data analysis

Business Use-Cases

- Automatic Lead Qualification & Routing
- WhatsApp AI Agent - The AI Agent who replies to basic queries about the business from the dataset/kb
- Accounts-Payable Document Processing - Gets the invoice and create a Google Sheet with the help of AI
- Social Media Post Generator
- Lead Finder - Scrap internet to find potential leads for the businesses.
- VAPI- Voice Agent

Activities:

- Develop a customer support chatbot integrated with Slack
- Create a workflow that generates and stores content in Google Sheets
